Professional Summary

Results-driven software professional with 10+ years of experience in enterprise application development, business analysis, and project delivery. Progressed from Java Developer to Team Lead, Dev Lead, and Project Manager, with solid experience in Japanese outsourcing projects and cross-functional team coordination. Strong in requirement analysis, Basic Design, workflow definition, risk and issue management, delivery governance, and technical collaboration to ensure high-quality software delivery.

Work experience

Scrum Master / Business Analyst / Odoo Developer (10/2025 > Present) XinkGroup JSC / Startup

Lead end-to-end digital transformation initiatives for logistics and agricultural ERP projects. Work closely with customers and stakeholders to gather requirements, define workflows, prepare software specifications, and coordinate delivery execution. Contribute to system implementation and Odoo customization while ensuring alignment between business objectives and delivered software functions.

Tech stack: Java, Odoo, ReactJS, PostgreSQL

Platforms & Tools: CMC Cloud, GitHub, Jira, Notion

Scrum Master / Business Analyst / Team Lead (11/2023 > 10/2025) FPT IS

Contributed to the delivery of enterprise software products across carbon accounting, procurement, and insurance domains. Worked with Product Owners, business teams, and engineers to clarify requirements, define workflows, establish project direction, and govern delivery execution. Also supported technical foundation setup and front-end implementation for scalable enterprise platforms.

Tech stack: Java, Python, ReactJS, PostgreSQL, Keycloak, MinIO

Platforms & Tools: OpenShift, FPT Cloud, GitLab, Jira

Developer / Dev Lead / Team Lead (03/2016 > 11/2023) FPT Software

Built strong experience in Japanese outsourcing projects through long-term involvement in HR recruitment software maintenance and upgrade programs. Responsibilities included Basic Design documentation, development, legacy modernization, functional and performance testing, project coordination, and issue tracking. Progressed from Developer to Dev Lead and Team Lead while ensuring delivery quality and schedule control.

Tech stack: Java, Oracle Database, HTML, CSS, Unix/Linux Batch

Tools: Jira, SVN

Projects

MoveX - Logistics Enterprise Platform (VietNam) (10/2025 > Present) Scrum Master, Business Analyst

- Acted as the key liaison between clients, business stakeholders, and the technical team to conduct requirement workshops, analyze business needs, define workflows, and prepare software specifications.
- Managed project execution, including sprint planning, task coordination, delivery tracking, and alignment between business objectives and technical implementation.
- Supported end-to-end product delivery from requirement analysis through implementation for an enterprise logistics platform.

LongSinHERP - Agricultural Business (VietNam) (06/2025 > 12/2025)

Language
English: Intermediate Working
Proficiency (Reading & Writing)

Education

MiniMBA
(2024 > 2025)
FPT School of Business &
Technology
• Source: MiniFPT86DN

Information Technology
(09/2012 > 01/2015)
College of Technology, The
University of DaNang
• GPA: 3.2

Business Analyst, Odoo Developer (Freelancer)
• Collaborated directly with customers to gather and formalize business requirements for an end-to-end ERP solution in the agricultural domain.
• Developed and customized Odoo modules and business functions to support digital transformation and core enterprise operations.

VertZero - Carbon Accounting Software (VietNam) (02/2024 > 02/2025)
Scrum Master, Business Analyst
• Worked with the Product Owner to research ISO standards, GHG protocols, and ESG-related requirements, then translated them into software requirements and functional specifications.
• Established the initial codebase and system architecture for a new carbon accounting platform.
• Managed planning, execution, and delivery for a cross-functional team while maintaining progress and quality control.

Procuva - Procurement Management (VietNam) (11/2024 > 09/2025)
Scrum Master
• Planning and execution for an enterprise procurement solution, controlling scope, schedule, implementation risks, and delivery governance.
• Maintained delivery quality through progress tracking, issue resolution, and close coordination across teams.

AZINSU - Insurance Claim (VietNam) (10/2023 > 02/2024)
Business Analyst, Team Lead
• Worked with the Product Owner and BA team to clarify requirements and align functional expectations for product development.
• Analyzed the existing web application, defined solution direction, and supported development of the mobile app version.
• Built the initial source base and led the development team to ensure quality and schedule compliance.

HR Recruitment - Maintenance Project (Japan) (01/2023 > 10/2023)
Team lead
• Coordinated with customers and development teams to clarify requirements, plan delivery, and manage risks and issues.
• Monitored project progress, tracked delivery status, and drove issue resolution to keep execution aligned with schedule and quality.
• Led team coordination for ongoing maintenance activities in a Japanese project environment with strong emphasis on communication, stability, and controlled delivery.

HR Recruitment - Upgrade Project (Japan) (05/2022 > 01/2023)
Developer Lead
• Led legacy modernization activities, including migration from Pro*C to Java and from Unix Batch to Linux Batch.
• Performed functional, coverage, and performance testing to ensure stability and compliance with customer-defined quality standards.
• Coordinated with customers and internal teams to manage execution planning, issue tracking, and delivery control during the upgrade phase.

HR Recruitment - Maintenance Project (Japan) (06/2016 > 05/2022)
Developer / Developer Lead
• Prepared Basic Design documents and translated customer requirements into clear processing flows and implementation specifications.
• Delivered enhancements tasks based on approved design documents, ensuring alignment between requirements and system behavior.
• Performed functional, coverage, and performance testing to support stable release delivery and maintain application quality.
